ELEGANCE
IN MOTION

I took the path of a dream, following an idea of style, innovation, joy, and freedom, seeking perfection and shunning mediocrity. That idea was all my own, and I realized it alone, protected by my family, in a small, intimate space. In my free time, I engaged in reading, drawing, and modeling, fascinated by the beauty that technique and art can express.

I decided that the Vespa, a Made in Italy myth in the world, had to come back to life and transformed into an even more unique, memorable, and inimitable creation: an extraordinarily stunning and functional work of art to be experienced or just admired, blending design and passion in a perfect balance. This is how Biscottino came to life, my first art Vespa.

DESIGN

IMPOSSIBLE IS POSSIBLE

My works are all the result of a strict discipline. I always start with the necessary, a simple sketch, then I perfect it and work with my craftsmen on the possible, identifying new aesthetic horizons, harmonising them with technical possibilities, selecting suitable materials. It is only by working by hand that I am able to find the vision that transforms the necessary and the possible into the impossible: an exclusive, fascinating design object to be treasured with care or used for a dream walk.

MY IDEA:
TO CREATE THE MOST BEAUTIFUL VESPA
IN THE WORLD.

Dino Brusino

ART IS A DETAIL

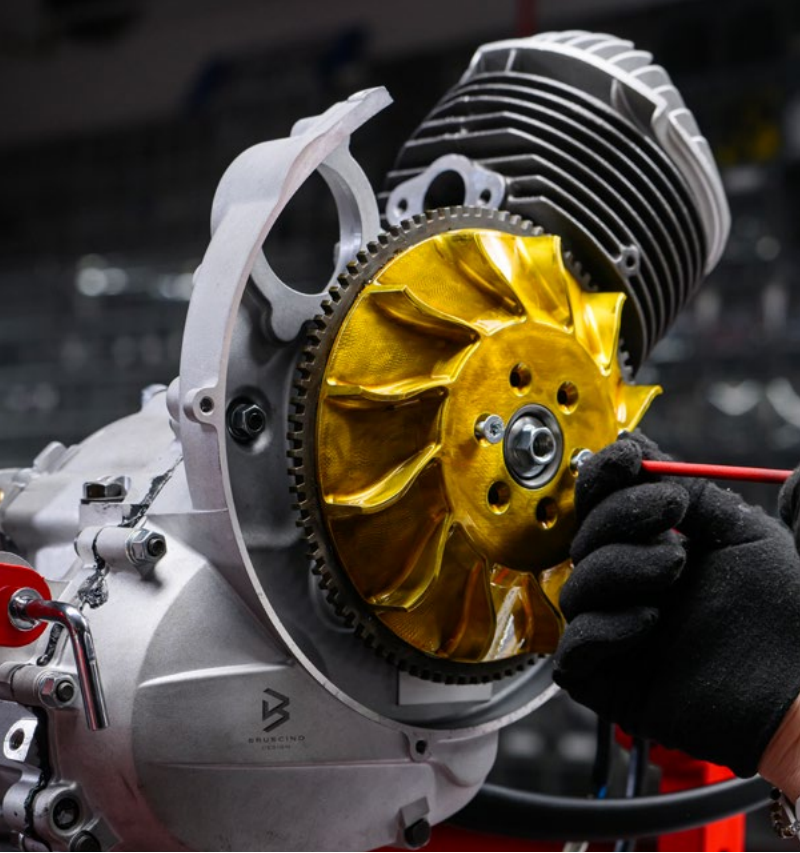

Working steadily and quietly, with maniacal rigour, combining different worlds, I designed an exceptionally elegant beauty and quality of finish. Precious materials, carefully selected. Haute couture creations of the highest quality to make the object rare, unique, inimitable.

**A FEW FOR A FEW
FOR BIG MARKETS**

Each of my Vespas is unique, a signature piece, made for special people in special markets like Dubai, Milan, Miami, Montecarlo, New York and Tokyo.

ITALY, THE LAND OF BEAUTY

For me, Made in Italy means style, class, beauty, freedom of thought, charm, elegance and wonder, incredible craftsmanship, savoir faire and technology, it means the joy of living. My Art Vespas are born from this world.

VESPA D'ARTE, AS UNIQUE AS THOSE WHO CHOOSE IT

My Vespas d'Arte are skill, imagination, beauty, emotional strength, unprecedented materials, shapes and colours that transform and contaminate, transforming a Made in Italy myth into art. Art that presents, confirms and communicates identity. My Vespas d'Arte are a meeting place, they have their own language, they are intended for a specific public that makes life an art.

CHARITY AUCTION “REWILD THE PLANET” MONACO

Limoncino was the star of the ‘Rewild The Planet’ charity auction, an environmental awareness and fundraising event supported by Prince Albert II, which took place at the Monaco Yacht Club on 14th April. One of only four works selected by the Prince Albert II of Monaco Foundation, the Vespa, designed by BRUSCINO Design, was auctioned for the sum of €250,000 in the presence and direct support of the Prince himself.

PRESENTATION OF “OCEALIA” IN MONACO: A TRIBUTE TO THE SEA AND ITALIAN EXCELLENCE

In 2025, during an exclusive ceremony held at the iconic Hôtel de Paris Monte-Carlo, Ocealia — a custom-designed Vespa — was officially presented to His Serene Highness Prince Albert II of Monaco. It serves as a tribute to the Prince Albert II of Monaco Foundation, which is dedicated to protecting the oceans through initiatives focused on biodiversity conservation, combating pollution, and addressing climate change.

The name Ocealia, meaning “beyond the ocean”, symbolises a commitment that reaches beyond maritime borders, embracing a global vision for the future of our planet.

During the event, both Prince Albert II and Flavio Briatore signed the Vespa, making it a unique emblem of art, sustainability, and international outlook.

EVERY ART VESPA IS SO UNIQUE THAT IT'S UP
TO HER TO CHOOSE WHO GETS TO OWN HER.
